

Digital Dye Sublimation Transfer Paper

HT-Q 100S

100gsm, **STICKY sublimation transfer** paper for aqua-based dye sublimation inks, enhanced treatment of adhesive power to the textile and stretchable fabric for the reduction of slippery and shrinkage difference between the sublimation paper and textile when it applied to the calendar(roll) press specially. Fast drying and high transfer rate efficiency increased due to the light paper weight, easy handling, excellent stability and performance for excellent color reproduction on polyester T-shirts and polyester or polymer coated substrates.

Application:

It is better quality achieved when bicycle, and stretchable sportswear manufacturing by the roll heat press especially. Higher energy efficiency Transfer on all possible polyester materials and polyester and polymer coated substrates – Textile, Banner, Flags, Apparels, Sports jersey,

Advantage:

High transfer rate

Printable and non-printable side is clearly noticeable

Excellent Good drying time

Stability and performance

Excellent color brilliance on polyester textile and coated substrates

Width	Length	Diameter	Core
1600mm(63")	100m(328ft)	160mm / 140mm	76mm(3"), 50mm(2")
1320mm(52")	100m(328ft)	160mm / 140mm	76mm(3"), 50mm(2")
1118mm(44")	100m(328ft)	160mm / 140mm	76mm(3"), 50mm(2")

COMPATIBLE Printer Manufacturers : EPSON, MIMAKI, MUTOH, ROLAND
